

MATHEMATICS - YEAR 13

Aims

- To develop further the skills learnt at AS level
- To learn more elegant methods for solving more complex problems
- To explore areas of maths beyond the scope of the AS course

Course Description

Students study the OCR MEI A level course. They study Core 3, Core 4 and Statistics 1. There is a piece of coursework in C3 and a Comprehension paper after the C4 exam. All modules are supported by the MEI textbooks.

Assessment

Students sit the Statistics 1 module in January and Core 3 and Core 4 modules in June. Students sit mock exam papers and follow a comprehensive revision programme in preparation for each module.

Homework

Students are made aware that there is rarely time in class to complete the exercises from the textbook fully, they should be carrying on with this practice outside of lesson times. Students will be set specific questions to complete and hand in at intervals throughout the year for marking by their class teacher.
